

QUALITY POLICY

At GRUPO EMB, our mission is excellence in:

Distribution and commercialization of medical products, in particular equipment and consumables for human assisted reproduction techniques and for gynaecology and obstetrics.

Technical service of laboratory equipment for assisted reproduction.

General management bases its strategy on the following commitments:

- **Understanding the Environment:** We are committed to continuously analysing the context of our organization and the expectations of our stakeholders, ensuring that our Quality Management System evolves with market needs.
- **Proactive Risk Management:** We identify and evaluate risks and opportunities in all our processes to minimize incidents, ensuring the safety and integrity of healthcare products.
- **Customer focused and technical excellence:** We aim to exceed our customers' expectations through high-level technical-commercial support and a technical service of laboratory equipment that ensures maximum reliability and continuity of your processes.
- **Strategic Supplier Alliances:** We foster stable and mutually beneficial relationships with our suppliers, considering them as key partners to ensure the quality and traceability of the products we market.
- **Compliance and Involvement Culture:** We promote the commitment of our entire team to strict compliance with legal, regulatory requirements and quality system standards, encouraging their training and participation.
- **Continuous improvement:** We strive to continuously optimize our processes and services, boosting the effectiveness of the management system to maintain our competitiveness and leadership in the sector.
